

# Planting the Seeds for Early Learning

## What We Do...

Our focus is on fun and interactive ways to support the development of healthy minds and healthy children through play, music, communication, and technology to promote school readiness.

We are devoted to the physical, emotional, cognitive, and social development of children by strengthening the bridge between home and school while building a stronger community.

## How We Do It...

### Child Care Centers

- **Northlight Childcare Advantage Program**— become a NCAP center and receive the tools, resources, and training to support the use of American Sign Language (ASL) in your curriculum.
- **Educator Classes**—learn how to support children’s developing vocabulary and pre-literacy skills, and how to extend and strengthen communication into favorite books, songs, and finger plays using ASL for young children
- **Brain Development**—learn the importance on how the brain develops in the first five years of a young child’s life and how you can impact that development with music, play and sign
- **Consulting**—we can provide assistance in effective ways to support early learning. ~ Example; setting up a rich early learning environment, classroom management and supporting pre-literacy skills and language development for all children

### Families

- **Family Workshops**—host families so that they may learn the benefits of using American Sign Language (ASL) with their infant, toddlers and young children
- **Sign, Music & Play Classes**—host this interactive and fun-time class and provide your families with young children a way to learn new and successful ways to communicate using American Sign Language. This wonderful opportunity links music, play, and sign together to help build a strong family bond while supporting their language development and pre-literacy skills
- **Parenting Classes**—based upon the award-winning series, “I Am Your Child” by Parents Action for Children, our workshops will provide your families with the importance of the first three years and how to support literacy through music, play, communication and reading
